PROFESSIONAL SUMMARY

MSc Advanced Computer Science graduate with commercial experience in application support, system reliability, and user-centric troubleshooting. Proven ability to log, investigate, and resolve technical incidents while maintaining clear documentation. A proactive problem-solver with strong analytical skills and a genuine interest in IT systems, application stability, and continuous service improvement.

EDUCATION

MSc Advanced Computer Science Sept 2025 - Sept 2026
University of Liverpool, Liverpool, UK
Relevant Coursework: Cloud Computing, Efficient Algorithms, Data Mining and Visualisation, Machine Learning, Privacy and Security
Geospatial Specialism: Advanced Geographic Visualisation, Geographic Data Science

BTech Computer Science (Cyber Security) 2020 - 2024
JECRC University, Jaipur, India
Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering and Project Management

KEY SKILLS

- **Systems & Process:** Business system analysis, process improvement, workflow documentation, system adoption, data migration
- **Data & Analysis:** Python (Pandas, GeoPandas), SQL, data manipulation, Excel, visualisation
- **Technical:** React, Node.js, JavaScript, TypeScript, REST APIs, MongoDB, PostgreSQL, Git, CI/CD
- **Soft Skills:** Stakeholder engagement, cross-functional collaboration, problem-solving, training delivery

EXPERIENCE

Full-Stack Developer Intern Feb 2024 - Jul 2024
NETPARAM Technologies *Jaipur, India*

- Delivered production-ready features to Dealkarts, a live e-commerce platform, in a 5-person Agile team, taking ownership of modules from requirements through to deployment and user support
- Developed and maintained reusable frontend components, documenting technical specifications and supporting team adoption to drive consistency and reduce duplication
- Implemented secure user authentication workflows, troubleshooting frontend and backend issues to ensure smooth user experiences and system reliability
- Provided ongoing technical support for live features, diagnosing and resolving frontend and backend issues reported by users and QA teams to ensure system stability

PROJECTS

TrainRadar. Built a real-time geospatial data platform that optimised third-party API consumption through intelligent caching and pre-filtering, reducing costs and improving system performance. Designed a Flask backend with 7 REST endpoints for live positions, departure boards, journey legs, and route geometry. Managed complex spatial datasets using OpenStreetMap route data with linear referencing against curved track geometry.

DeviceDepot. Independently designed, built, and deployed a full-stack business system with complete user and admin workflows, including product management, inventory tracking, order processing, and user administration. Implemented JWT authentication with role-based access control. Deployed backend on Render and frontend on Vercel against MongoDB Atlas.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, SQL, Java
Web	React, Node.js, Express, Next.js, Flask, REST APIs
Data	MongoDB, PostgreSQL, MySQL, Pandas, GeoPandas, Shapely, scikit-learn
Cloud & DevOps	Docker, Kubernetes, CI/CD, Vercel, Render, AWS
Tools	Git, GitHub, Postman, JWT, Jupyter, Conda

CERTIFICATIONS

- EC-Council Certified Ethical Hacker (CEH)
- EC-Council Certified Network Defender (CND)
- EC-Council Certified (CC)
